## THE COMPANY

**SISAS SPA** is a leader company in signs and safety road field, able to properly answer to the needs of the modern road safety and monitoring system. The company offers a wide range of products from signs, to traffic and mobility monitoring systems, its aim is to achieve the goal of increasing the safety level on the road and inside working sites.

The production is spread over three sites: one in Perugia (Italy) and the other two in Bulgaria, each one specialized in a different production: each of them has its own managing autonomy but all of them rely of Sisas Italy know-how that has made Sisas a landmark in the Italian signs safety market.

Sisas has extended its activities to the closest markets and has understood the importance of strategic diversification of the production. During the years the company has increased its products portfolio and services and has transformed itself, in a short time, into one of the most competitive and complete companies in the sector, with wide response in the Italian and abroad market.

## THE HISTORY

Sisas's story began in Umbria in 1980 with the production of highway signage and products to prevent traffic accidents.

It embarked on a path of constant evolution, alternating changes, development and innovation in a continual search for solutions to increase safety on the road.

So, to the production of signage, in the early 1990s, we added electronic instruments through the acquisition of a company in the field of traffic monitoring.

In 1995, the company's strategic and operational scope continued to expand with the creation of Bulgaria SI.ZE, allowing entry into the market of rubber for road signs.

In 2004, we founded Sisas Techtronic, which specializes in the design, manufacture and marketing of high technology electronic products for traffic control. Finally, in 2006, we founded Sisas BG, also in Bulgaria, to produce entry-level electronic materials and mold plastic parts. Thanks to our sites in Bulgaria and rapid growth in European markets and beyond, Sisas has assumed a growing international vocation. Proof of this are the installations of its products on the streets of many countries around the world and participation in major trade shows both in Italy and abroad.

## THE MISSION

The company's priority is the safety of road users, be them vehicles or pedestrians. Prevention is better than punishment and the best way to handle accidents is to avoid them. Sisas designs every product following this precise logic, while conforming to the most stringent construction standards and the strictest ethical codes.

## INDUSTRIAL GROUP

**Sisas SpA** - manufactures and sales road safety products.

Sisas SpA is located in Perugia (Italy), in an industrial facility consisting of three different buildings, built in different periods, but united among them in a single factory body. It is organized in two levels with a total surface area of 7,962 square meters. In addition to the internal sales & marketing team, Sisas has a network of agents and development consultants, organized by market areas and Products. The Perugia office staff is also composed by SISAS Techtronic Division, that is specialized in systems and electronic devices for mobility, signs, parking access and monitoring and traffic planning.

**SI.ZE JSC** - Production of the complete range of rubber road safety products.

Established in June 1996, it is an holding under Bulgarian law with registered office in Novi Iskar- Sofia. It is extended for 2.597 square meters covered surface, composed of specialized departments of molding, painting and gluing. The company represents a strategic subsidiary (82.5%), not just for the local market with strong growth, but also for the international markets. Si.Ze JSC introduces itself as an important supplier for rubber material products for road safety.

**Sisas BG LTD** - Production and marketing of electronic devices for road signs and road mirrors.

Sisas Bg Ltd was born in 2007, in that year Sisas bought it with a participation (equal to 85% of the capital). It is located in Bulgaria, and it is a landmark to open the market of the group abroad. The company manufactures electronic devices for road signs and road mirrors, its main market is abroad.

Thanks to the valid professional resources of the staff and coaching provided by local members, Sisas Bg

Ltd immediately distinguished itself by competence, flexibility and reliability, and it has immediately achieved excellent economic results. The production building is located in Plovdiv, (Bulgaria) and covers a total area of approx. 7.618 square meters. The covered area, that is used for production is 1290 square meters while the offices cover a total area of 251,49 square meters.

## THE PRODUCTS

Sisas designs, manufactures and realizes integrated safety road systems and working areas, it guarantees to its customers the highest level of personalization and flexibility of production. The experience, gained in over 20 years of activity, permits to the company to satisfy to the most advanced inquiries of the customers in the monitoring and safety field.

A dynamic and flexible productive system permits Sisas to realize a wide range of products, respecting the highest quality standards. Each process phase has rigorous controls according to ISO 9001 certifications, so that the company can guarantee that all the products are in compliance with Italian and UE regulations, with high standards according to the specific law.

### Permanent Signs System

- Signs devices
- Delimitation devices
- Speed reducing devices
- Road signs and other equipment

### Temporary Signs Systems

- Warning lights devices
- Signs, supports and delimiters
- Accessories and work zones devices

### Mobility Systems and Devices

- Monitoring and dissuader systems
- Prevention, information and control systems

### Safety Systems and Devices

- Motor vehicles devices
- Buildings devices
- Individual Devices

**SISAS Techtronic** is SISAS SpA group division, specialized in analyzing and understanding the needs of public sector and private companies for the safety and traffic monitoring and for traffic mobility through the production of high-tech items. For every inquiry, Sisas SpA works to guarantee personalization, installation, maintenance, assistance and providing personalized services at any time and for any customer. For our company is very important the technological innovation promotion through the construction of always updated and advanced systems that meet all our contacts and customers needs. The current problems of both urban and suburban mobility require constant and timely monitoring of traffic and the further actions activation for flows regulation and its spread of information to the user. This information includes and evaluates all those situations that can change the trend of the traffic, such as the queues, accidents, difficult meteorological conditions, limited traffic areas.

**SISAS Techtronic** offers customized projects and solutions, which allow to reach quickly and effectively the setting subjects, including the safety increase, the road decongestion, the accidents prevention, the rapidity to report anomalous events (accidents). This can permit the reduction of intervention time from the first aid vehicles, the reduction of traffic and, finally, the planning of the infrastructures maintenance or design of new one.

**SISAS Techtronic** SISAS Techtronic provides both individual products and complex ITS systems, including development software, integration and implementation of existing systems, providing services, facilities maintenance and offering a wide range of solutions to the traffic management problems with a high degree of functionality and "turnkey" reliability. One of the advantages of our systems is the realization of a modular architecture, where from time to time further solutions can be upgraded, in response to the customer needs, according to the principle of preserving the already made interventions.

## CERTIFICATIONS

All stages of the production process, from production to delivery and customer care, are performed using methods and techniques of skilled work in compliance with ISO 9001: 2008 certified Quality Management System; -Certificate of Constance of Performance 0474 / CPR-0664 (in compliance with regulation no. 305/2011 / EU of the European Parliament and Council of 09/03/2011).

- "Manufacturer vehicle" CUNA Certification (Manufacturer's Code World: H 52) - SOA certificate OS9 II
